

Nature monument Plešivec

Intended for : Family, Group, Small Children with Adult, Senior, Tourist, experienced Hiker, Athlete, School Group, foreign Tourist

As: by foot, by bike

GPS: 50°33'54.488"N, 14°5'21.603"E

Usual Duration: 3 hrs

Distance from the center: 4.56 km

Extraordinary large debris with ice pits at the foot of hill Plešivec are composed of large blocks of basalt rock which are mostly movable only rarely stabilized with old exemplars of lime trees which vegetate here under extremely severe conditions. Function of pits at Plešivec has been partly disrupted by quarrying before implementation of protection programme. In spite of that, snow and ice remain here till the beginning of summer.
