

National nature monument Borečský vrch

Intended for : Family, Group, Small Children with Adult, Senior, Tourist, experienced Hiker, Athlete, School Group, foreign Tourist

As: by foot, by bike, by car

GPS: 50°30'50.837"N, 13°59'19.339"E

Usual Duration: 3 hrs

Distance from the center: 10.35 km

Practical information:

15 km from Litoměřice

Trachytuppe (446m), geological composition of which is essential for exhalation of warm and humid air from the upper artificially enlarged orifice of a crevice system in winter. Direction of the airflow is conserved in spring. Cold air comes out from crevice orifice at the foot of extended debris. This specific microclimate allows rich flora and fauna to survive.
